

Switch Adapted Electric Water Gun

MAKER GUIDE

Required Components

1. 	2. 	3. 	BOM 1. Ansee – Electric Water Gun 2. 3.5mm mono jack 3. 24 AWG wire Refer to the Tool and Component List for purchasing details.
---	---	--	---

Required Tools

- Phillips screwdriver
- Wire strippers
- Soldering iron and solder
- Drill and 1/4" drill bit
- Flush Cutters

Required Personal Protective Equipment (PPE)

- Safety glasses

Switch Adapted Electric Water Gun

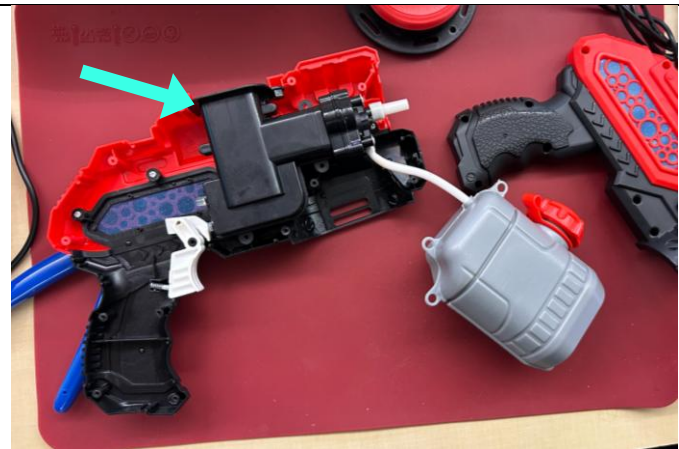

MAKER GUIDE

Assembly Instructions

1. Open the toy by removing the 13 screws securing the toy.

2. Disconnect the black battery compartment from the rest of the toy.

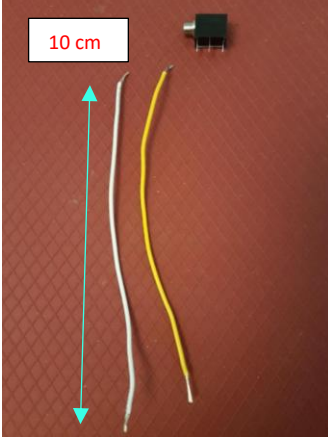

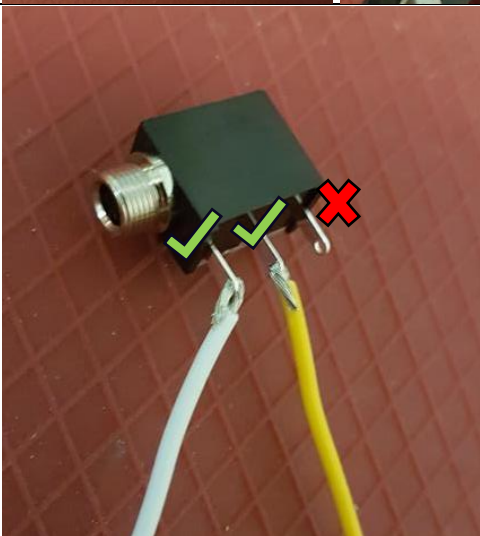

3. Pry open the battery compartment from the top.

MAKER GUIDE

4. Cut 2 pieces of wire each 10cm in length Strip both ends of both wires, leaving about .5 cm of exposed wire on each end	 
5. Pick one wire and hook the end onto the left lead on mono jack. Note the jack orientation. Repeat for the second wire with the middle lead. Solder wire to mono jack. Double check that you have the correct metal arms of mono jack, refer to picture	
6. Prior to soldering to the device, tin your 2 wires. The best way to do this is cover the exposed wire end in solder.

MAKER GUIDE

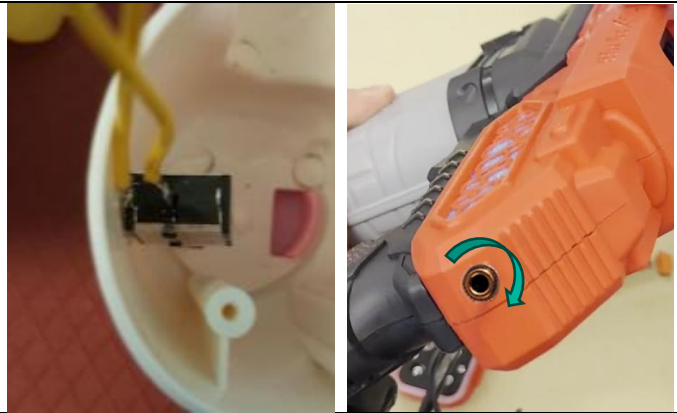

7. Identify the black switch in the battery compartment. Solder the end of one wire prepared in Step 5 to the location depicted.	
8. Solder the end of the second wire prepared in Step 5 to the location depicted.	
9. Reassemble the battery compartment, making sure the mono jack is on the outside.	
10. Use a drill to make a hole in the depicted location.
